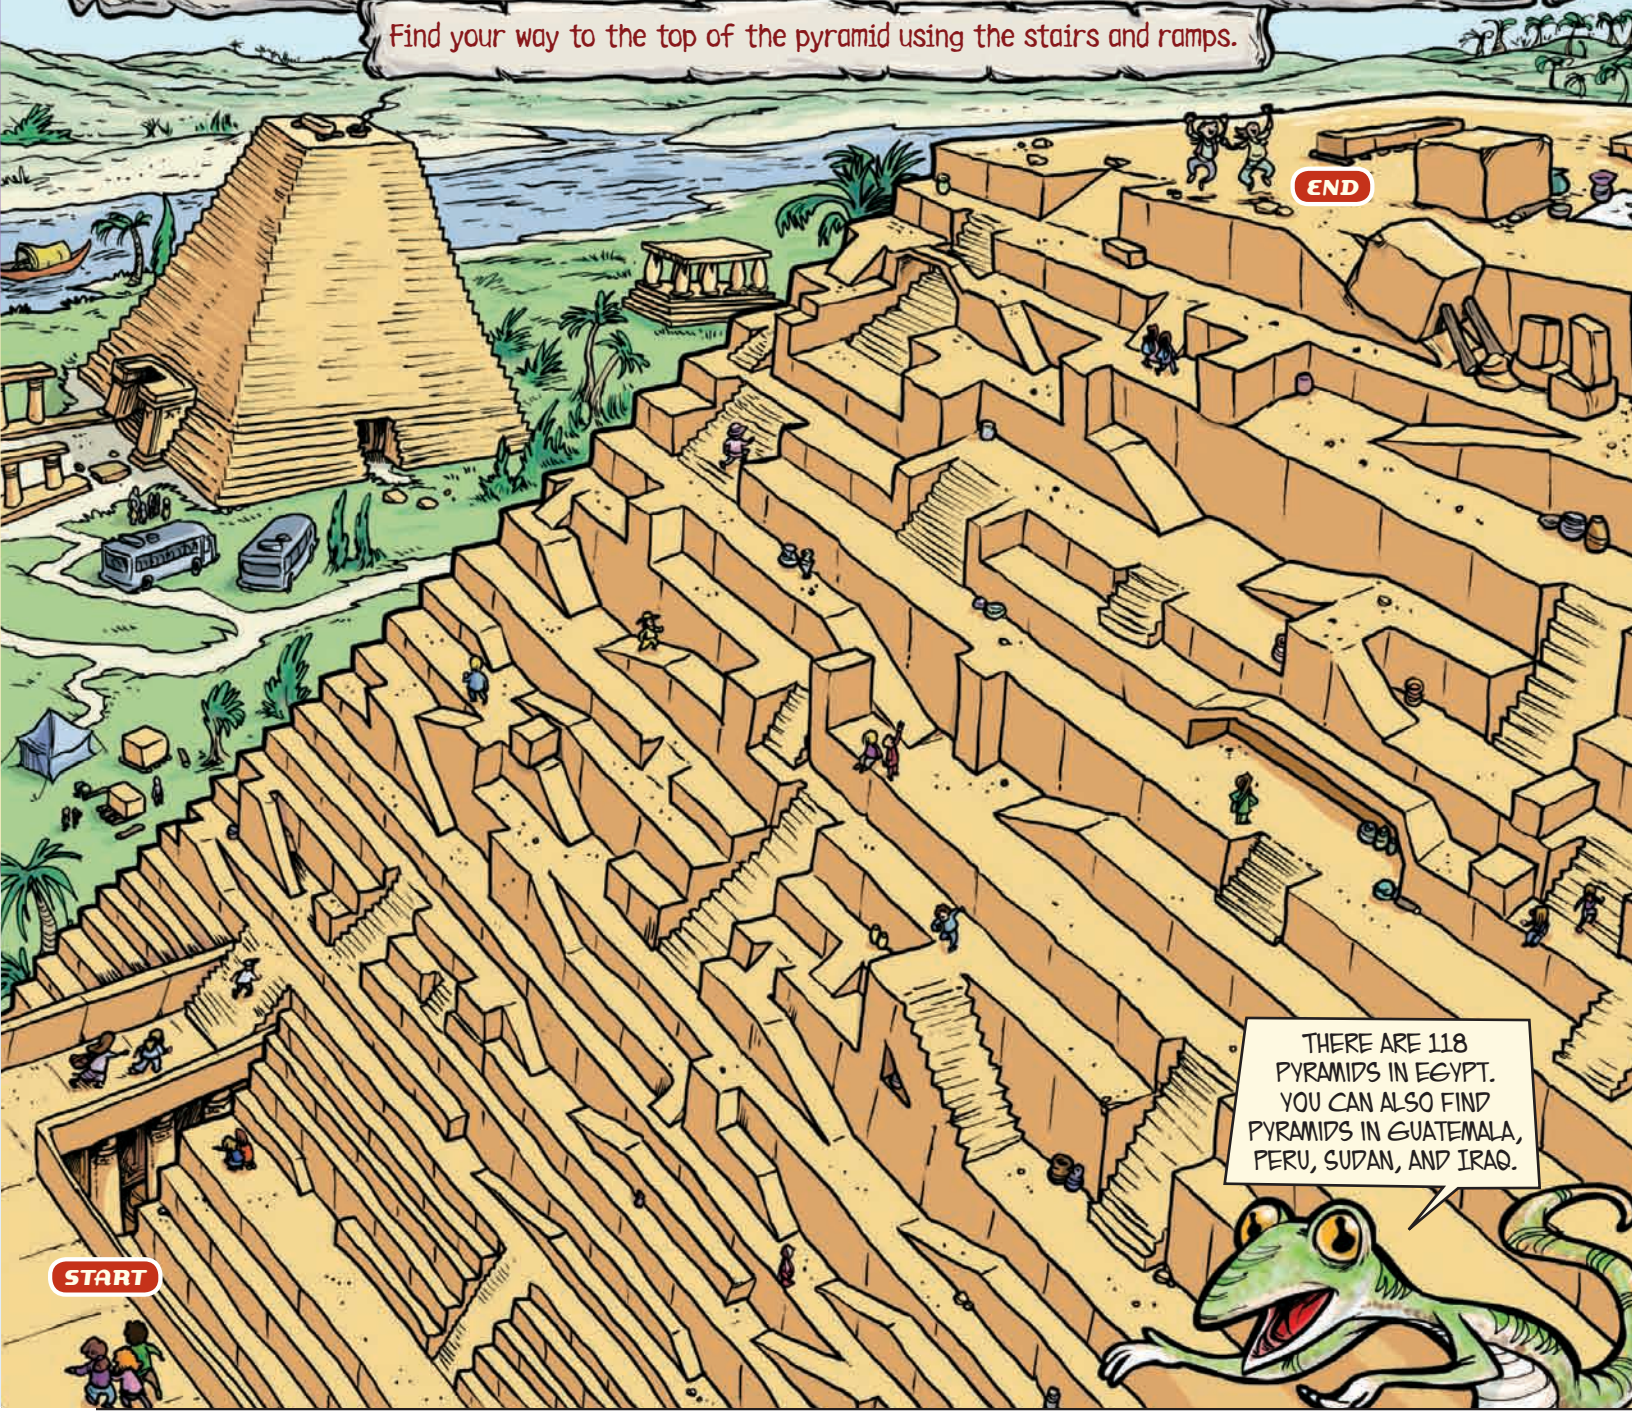
STEP BY STEP

From Mexico to Egypt, mysterious stone pyramids rise out of jungles and deserts. Their history and treasures have fascinated people through the ages. Some were temples with elaborate carvings and religious symbols. The pyramids in Egypt served as royal tombs for the pharaoh and his family.

In the Sahara Desert thousands of years ago, there were no modern tools. Imagine using hand tools to cut giant stone blocks weighing as much as five camels! Scientists believe workers used wooden sleds to drag the stones for miles and up ramps. It took about 20 years to build the largest pyramid in Egypt.

These landmarks give us clues about ancient cultures, beliefs, and ways of life. The vision, creativity, and effort used to build them can inspire us. When you're struggling with something that seems too hard, think of the pyramid builders. Remember that step by step, you too can do amazing things.


Find your way to the top of the pyramid using the stairs and ramps.
